

Angular Hands-On 3 Report

Aim

To implement structural directives, attribute directives, a custom directive, and a custom pipe in Angular.

Work Done

- Implemented *ngIf with a loading message.
- Implemented *ngFor with trackBy to display course cards.
- Implemented *ngSwitch for Passed, Failed, and Pending badges.
- Added an else block using ng-template for an empty course list.
- Used ngClass for conditional CSS classes.
- Used ngStyle for dynamic border colors.
- Implemented isExpanded with ngClass.
- Used a getter for cleaner template bindings.
- Created a Highlight directive for hover effects.
- Applied appHighlight to course cards.
- Created a CreditLabel pipe to display credit text.
- Configured the Highlight directive using @Input() for custom colors.

Verification

- Loading message displayed before courses loaded.
- Dynamic badges and styles were applied correctly.
- Cards highlighted on hover.
- Credits displayed in readable format.
- No courses available message displayed when list was empty.

Result

Hands-On 3 was completed successfully. Structural directives, attribute directives, custom directive, and custom pipe were implemented and verified.
